## ■ MEDICAL PRESCRIPTION

HealthAI Nexus - AI-Powered Healthcare Assistant

**Date of Issue:** November 07, 2025

**Time:** 10:04 PM

**Prescription No:** RX-20251107-ASU2

### PATIENT INFORMATION

Patient Name:	ASU21
Age / Gender:	22 years / Not specified
Weight:	90.0 kg (198 lbs)
Height:	170.0 cm (5'6.9")
BMI:	31.1 (Obese)
Allergies:	None reported
Current Medications:	None

### ■ PRESCRIPTION

**\*\*PRESCRIPTION FOR ASU21\*\***

**\*\*Rx (Medications)\*\***

1. **\*\*Loperamide (Imodium)\*\***

- Strength/Dosage: 2mg

- Route: Oral

- Frequency: 1 capsule after each loose stool, not to exceed 4 capsules in 24 hours

- Duration: for 5 days

- Special instructions: Take with food to minimize gastrointestinal upset

2. **\*\*Acetaminophen (Tylenol)\*\***

- Strength/Dosage: 650mg

- Route: Oral

- Frequency: 1 tablet every 4-6 hours as needed for pain or fever

- Duration: for 5 days
- Special instructions: Do not exceed 4 grams in 24 hours; take with food to minimize stomach upset

### 3. **Meclizine (Bonine)**

- Strength/Dosage: 25mg
- Route: Oral
- Frequency: 1 tablet every 4-6 hours as needed for nausea
- Duration: for 5 days
- Special instructions: Take with food to minimize drowsiness

### **INVESTIGATIONS**

- **Complete Blood Count (CBC)**: to rule out infection or inflammation
- **Stool Culture**: to identify any bacterial or viral pathogens
- **Electrolyte Panel**: to assess for any electrolyte imbalances

### **ADVICE**

- **Dietary Recommendations**: Follow a bland diet (BRAT diet: bananas, rice, applesauce, and toast) for the next 3-5 days to help firm up stool and reduce symptoms. Gradually introduce other foods as symptoms improve.
- **Activity Restrictions**: Avoid strenuous activities and get plenty of rest to help your body recover.
- **Warning Signs to Watch For**: Seek immediate medical attention if you experience severe abdominal pain, vomiting blood, fever above 101.5°F, signs of dehydration, bloody diarrhea, or difficulty breathing.

### **FOLLOW-UP**

- **Return in 5-7 days** for a follow-up appointment to assess symptom improvement and review laboratory results.
- **Monitor** for any worsening of symptoms, such as increased abdominal pain, vomiting, or fever, and seek immediate medical attention if you experience any of these symptoms.

### **Patient Education**

- It is essential to stay hydrated by drinking plenty of fluids, such as water, clear broths, or electrolyte-rich beverages.
- Practice good hygiene, such as washing your hands frequently, especially after using the bathroom and before eating.
- If you have any questions or concerns, do not hesitate to contact our office.

### **Signature**
